Excellent opportunity for Product Engineer in an established multinational in Selangor, Malaysia. A new division (Analog, Mixed Signal & Power) will setup its manufacturing activities in Malaysia. A great opportunity for those who wants to experience the challenge and excitement setting up manufacturing site. Don't miss out this great opportunity!!!

Job Responsibility:

- Work with Design, Device, Test, Application, Process and QA

Engineers, to evaluate new product and new wafer fabrication and assembly process.

- Perform and coordinate Reliability and Electrical test and Failure verification and Failure Analysis on the products.
- Develop, evaluate, and improve manufacturing methods, utilizing knowledge of product design, materials and parts, fabrication processes, tooling and production capabilities, assembly methods and quality control standards. Work flexible hours as required to meet project deadlines.
- Specification configuration management.
- Administrative product management.
- Build and maintain traceability matrix.
- Participate in DFMEA.
- Manage characterization and qualification plan definition.
- Evaluate test coverage.
- Drive product characterization, collect and analyze data from lab and final test.
- Perform product qualification, reliability tests, ESD, latch-up, etc?
- Set up production tools in final test (burn-in, ATE, dash boards).

- Prepare CAB sessions and PPAP documents.
- Manage yield improvement, zero defect plans (PAT, SBL, JVT?) and production ramp up and sustaining.
- CQI investigations (ATE test, lab analysis and FA lab follow up).
- Use problem solving tools: 8D, FTA.

If you are interesting to apply this job, please send your most updated resume to career_advisor@resumeweassist.com . We will work with your future employer to access your suitability for interview.

Good luck!!

CMS ARTICLE - INTRODUCTION TO CMS

CMS is a simple system or rather a cycle to market your career effectively.

CMS model consists of basic job search activities (such as looking for a job, resume writing, attend interview, follow up, job offer, negotiation & job offer acceptance or rejection) is actually not new to many of us. But, unfortunately not many realized that the process we are using to get a job is actually a marketing process. Now days, marketing is a buzz word in business regardless offline or online, so incorporating it into a job search will change its strategy or to put it in another way, a new breath in the skill of looking for a job.

OBJECTIVE OF CMS

CMS is established as a guide for job seekers to **SEARCH, SECURE** and **NEGOTIATE** a suitable job for themselves. The structure of CMS is

leveraged from basic marketing principals where job seekers are able to use some basic marketing techniques to let their future employer know that they are **CAPABLE, KNOWLEDGEABLE** and **SKILFUL** to get the a job done. At the same time **CONVINCE THEIR FUTURE EMPLOYER THEY ARE THE BEST CANDIDATE**. To close the deal, job seekers also have the right to

NEGOTIATE SMARTLY THE BEST BENEFITS AS THEIR COMPENSATION. Basically CMS covers the complete cycle in the process of looking and securing a job.
