Quick Overview

Career Marketing System (CMS) is a simple system or rather a cycle to market your career effectively. CMS model as shown below is actually not new to many of us. But, unfortunately not many realized that the process we are using to secure a job is actually a marketing process. Now days, marketing is a buzz word in business regardless offline or online, so incorporating it into the job search will change the perspective or to put it in another way, a new breath in the art of looking for a job.

Career Marketing System (CMS) Model

Career talk highlight

CMS is established as a guide for job seekers to **search**, **secure** and **negotiate** a suitable job for themselves. The structure of CMS is leverage from basic marketing principals where job seekers are able to use some basic marketing techniques to let their future employer know that they are **capable**, **knowledgeable** and **skillful** to get the job done. At the same time **convince** their future employer they are the best candidate. To close the deal, job seekers also have the right to **negotiate smartly** the best benefits as their compensation. Basically CMS teaches & guides job seekers the complete cycle in the process of looking and securing a job.
